

YOUR HEALTH FIRST CONSIDERATION

You know that as well as anybody does, and yet you don't safeguard it. And animals must be healthy and particularly the cow. And the cows from which we get our milk cannot stand in and drink from hot, filthy, and stagnant ponds and at the same time expect to give pure milk. The public demand that they get pure milk and in the very near future will demand it all the stronger. Therefore, milkmen, prepare for the coming and inevitable demands of the public by installing your own pumping plant thereby furnishing your cows with exactly the same water you and your family drink. We make a specialty of pumping machinery and can very quickly install you a pumping plant best suited to your requirements. And at this particular time we feel quite assured that we can make you attractive prices as we are closing out and selling at cost our entire line of I. H. C. Engines on account of our becoming state jobbing distributor for the Foss Gas Engines.
